

LingroHub: Student How-To Guide

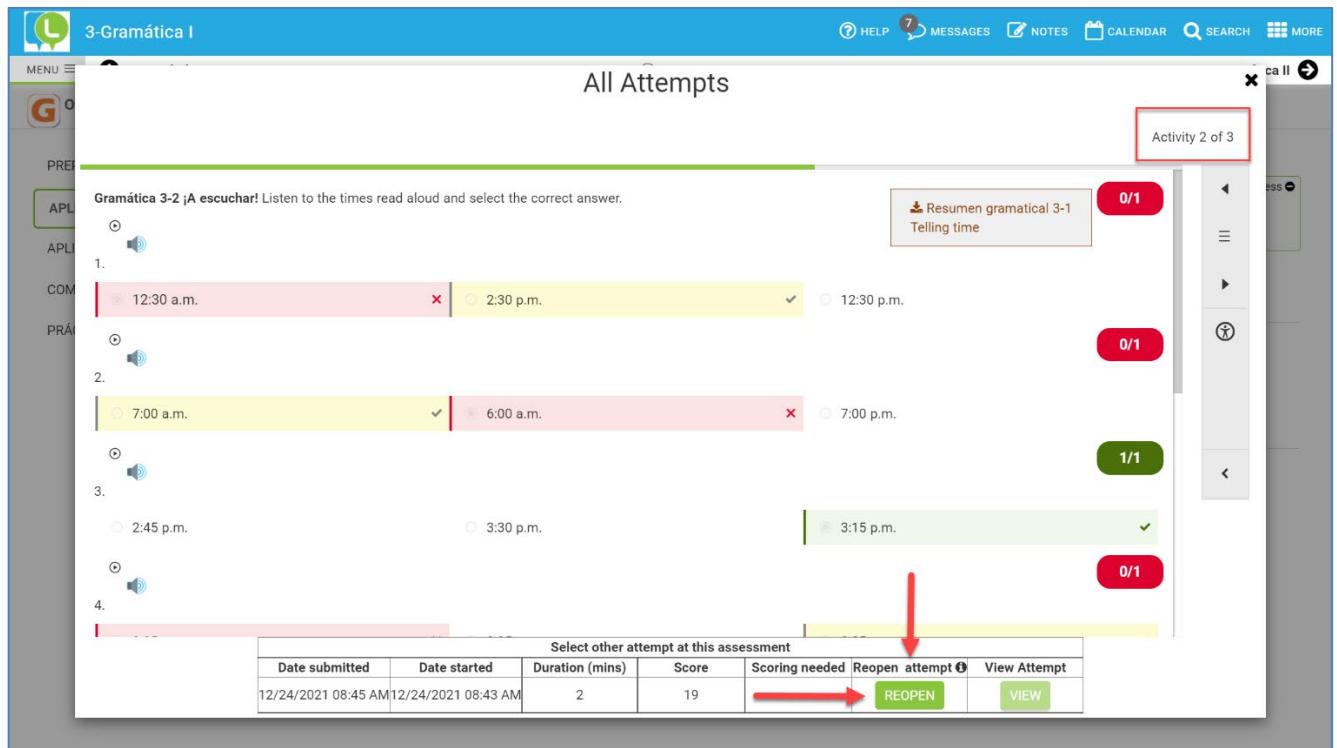

REOPEN: Correcting wrong answers / reopening your work after submitting

Reopen is a way for you to fix mistakes after you have submitted your work. **Reopen** can be used on any activities but it is particularly useful when completing sections like *Aplicar* that consist of a series of activities. **Reopen** allows you to fix only the items you got wrong instead of having to redo every activity in the sequence.

After you submit your responses, you will see your score (#1) in the activity information box. Click **REVIEW** (#3) to see what you got wrong.

When the new screen opens, you can click your way through the sequence of activities. In this example, the student did well on the first and third activities, but bombed the second one (highlighted top right).

LingroHub: Student How-To Guide

At this point you can choose to redo the entire sequence of activities or fix the sequence that was already submitted.

If you want to redo the entire sequence of activities, click the **X** at the top right of the review window and then click the **START** button.

If you want to fix items in your already submitted activities, click **REOPEN** (see arrows at bottom right).

Clicking **reopen** takes the sequence of activities out of submitted status. The activities that you already completed will reopen. You may see a message telling you to "wait while we are preparing your activities." When the activity set opens, locate the activity whose answers you want to change. Make the corrections. Click the right arrow until you get to the end of the sequence. Click **FINISH > YES**.

IMPORTANT: If you click **reopen**—even if you make no changes—you must resubmit by clicking to the end and clicking **FINISH -> YES**.

And finally, what if you have already submitted more than one time? In this case, when you click **REVIEW**, the panel will show all submissions at the bottom with a **reopen** next to each submission.

Unless your instructor has changed the default settings in the course, you may click only one reopen per activity sequence.

The screenshot shows the 'All Attempts' section for a '3-Vocabulario' activity. The activity title is 'COMPROBAR' with a score of 3/15. The instructions are: 'Vocabulario 3-15 ¿Cuándo estás libre? Follow the steps to help Gloria and Nico find a time to meet. Paso 1. Listen to the voicemail that Nico left for his classmate Gloria. Then, drag each activity to the appropriate time and date in the schedule.' A calendar for 'septiembre 5-11' is displayed, showing the current date as 'Hoy' (30° C / 26° C) and 'Mañana' (31° C / 27° C). Below the calendar is a table of submission attempts:

Select other attempt at this assessment						
Date submitted	Date started	Duration (mins)	Score	Scoring needed	Reopen attempt	View Attempt
12/23/2021 04:21 PM	12/23/2021 04:18 PM	3	5		REOPEN	VIEW
12/23/2021 04:18 PM	12/23/2021 04:18 PM	0	1		REOPEN	VIEW

Check the date submitted and scores carefully. In the above example, you will likely select the submission with the higher score to reopen.
